Professional Summary

Motivated and detail-oriented Front-End Developer with a focus on creating secure, responsive, and visually appealing web applications. Currently advancing my skills in JavaScript, React, and Node.js through a MERN stack development program at JENSEN Yrkeshögskola, specializing in cybersecurity. Experienced in collaborating on agile projects, building REST APIs, and integrating UI/UX best practices. I understand the importance of communicating complex technical concepts clearly to both technical and non-technical stakeholders, and I'm confident in interacting with customers to ensure their needs are met. Known for being a fast learner, team player, and effective communicator with a strong customer-focused mindset. Eager to contribute to a development team and grow in an entry-level front-end or full-stack role.

Skills

- Front-End: JavaScript (ES6), React.js, HTML5, CSS3, Responsive Design
- Back-End: Node.js, Express.js, MongoDB, REST APIs
- Security: Authentication (JWT), Authorization, Hashing & Salting, Secure coding practices
- Tools: Git, GitHub, Jira, Salesforce CRM, Agile methodology
- Communication: Strong collaboration, clear documentation, UI/UX design thinking
- Languages: English (Native), Swedish (Conversational)
